

ICON GUIDE

Carbon Fiber
Maximum stiffness where it is needed for efficient power transfer.

Dual Sole
A combination of rigid polyurethane for maximum energy transfer, and a Nylon perimeter that yields to absorb vibrations and minimize ground stress on the tendons and bones of the foot.

Multiped
A system of pedal loads that provides compatibility any pedal on the market. The variety of mounting plates allow pedals to be set up a variety of ways to achieve maximum efficiency and minimum stack-height.

Morpho Cage
A stretch resistant medialateral support cage which helps to preserve the integrity of the upper materials for years of wear.

D-Skin
A seamless construction of anti-bacterial ultra-light breathable mesh and micro-fiber providing superior pressure-point free fit.

Hi-Vent Insole
Maximum ventilation and comfort in every condition.

Multi-Fit Adjust
A patented closure system that allows customization to accommodate a greater range of foot sizes or thicker socks for seasonal riding.

Micro CL
Multiple asymmetric buckles with automatic release buttons. It offers perfect fit and is easily adjustable even while racing. The buckle features aluminum mechanics and is replaceable. Mud soles are easily removed thanks to the wing-out opening. The Polytech® supports a specifically designed distribution of pressure from the closure, evenly and is installed on shock-absorbing EVA inserts to prevent uncomfortable pressure.

Quick Adjustment
Resin-impregnated polyester fastening systems which runs through an aluminum strap lock to assure practical and secure fastening. Adjustments can be made with one hand, even while riding.

Duratech Rubber
Lightweight abrasion-resistant rubber compound combined with carbon powder for excellent grip in all conditions.

Windtex
Waterproof and lightweight combination of the durability and elasticity to provide breathability, comfort and thermal exchange.

Reflex
Reflective material of excellent visibility even in adverse weather conditions.
