

Cannondale Gemini Frame Gauge - P/N 114904

1. Place the gauge on under side of the down tube in front of cable guides.
2. Slide the gauge onto the tube with finger tips. Do not use strong force.

If the gauge fits flush against the downtube the frame was manufactured incorrectly and must be replaced.

If the gauge does not fit flush, the frame was manufactured correctly and does not require replacement.

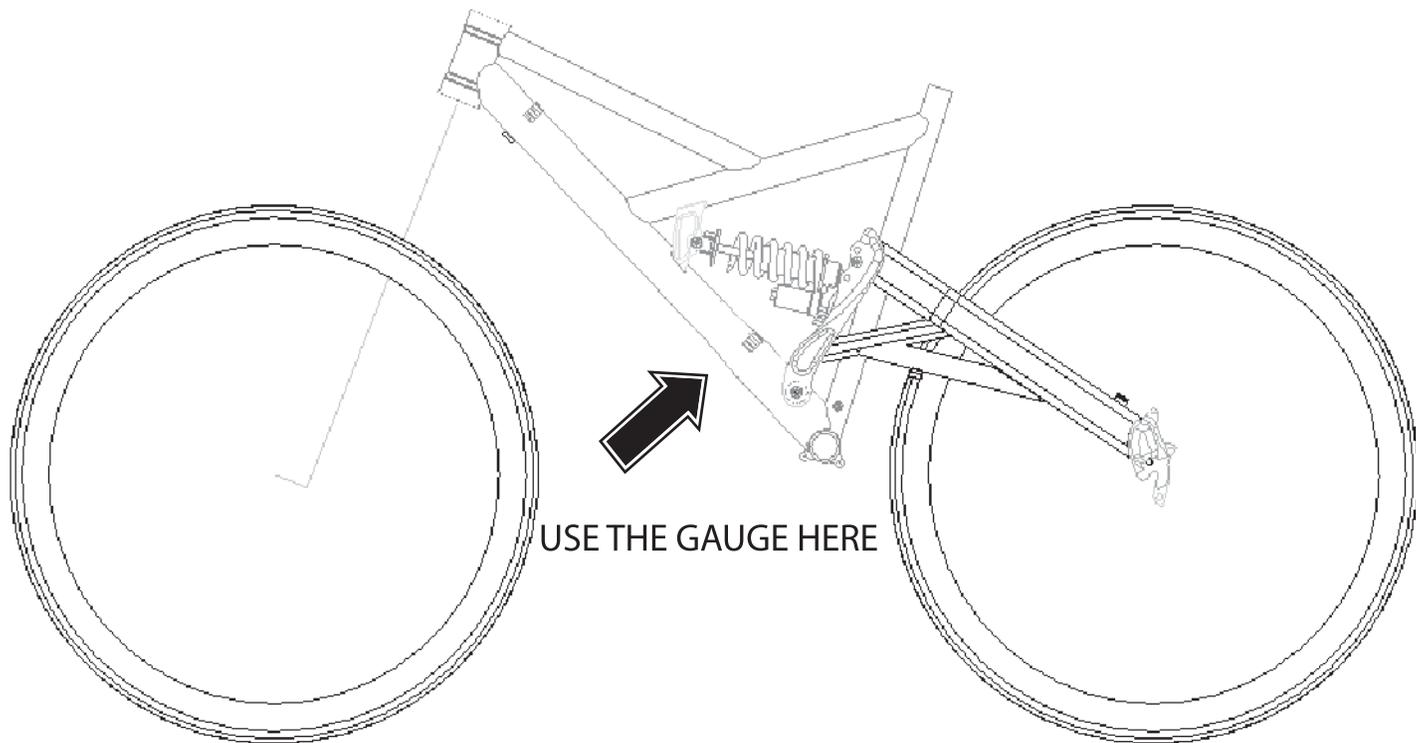

INCORRECT

This frame was manufactured incorrectly.
This frame **MUST** be replaced.
Call 1-800-BIKE-USA.

CORRECT

This frame was manufactured correctly.

* The gauge is for use on MEDIUM and LARGE size bike frames only.
SMALL and X-LARGE bikes do not require inspection.
