

# Pass it on!

We love riding, plain and simple. So when we decided to build kids' bikes, we engineered the bikes we'd want to ride if we could go back in time. High performance bikes, with features and technology drawn straight from the bikes we're riding now. Bikes that are so light, so stable, so easy and fun to ride that they're bound to create a love of riding that will last a lifetime. Around the office, we refer to these little Cannondales as "Heir-dales" because they really are engineered to pass something on to the next generation, something truly valuable...the love of the ride. **Pass it on!**

Oversized Head Tubes and Smooth Welds

Vibration-Absorbing Seat Stays

Internally Routed Cables

## *cannondale* **KIDS**

Cannondale's high-performance heritage is evident throughout our new kids' line. Ultra-light alloy frames with oversized head tubes and smooth welds. Vibration-absorbing seat stays. Lightweight alloy components. Internally-routed rear brake cables for a clean look and no pinched fingers. Custom comfort saddles. Race-inspired graphics. It all adds up to bikes that are truly a cut above. They should be. **They're Cannondales.**

## WARNINGS!

Bicycling has risks of serious injury or death that cannot be completely avoided. Risk can be minimized by: Reading and following all warnings and instructions in owner's manuals, owner's manual supplements, always wearing a helmet, practice and step-by-step learning, riding in control and within your capabilities. Adult parents, guardians must read all warnings and instructions, guide and supervise minors.

Cannondale urges that parents not permit kids to ride at dawn, at dusk, at night or at other times of poor visibility. Warning: Reflectors are not a substitute for proper lights. If parents choose to let kids ride in these conditions, or ride with kids in these conditions, it is your responsibility to equip the bicycle with all state and locally mandated lights. Riding at dawn, at dusk, at night or at other times of poor visibility without a bicycle lighting system which meets local and state laws and without reflectors is dangerous and may result in serious injury or death. If a bike is ridden before dawn or after dusk, it must be equipped with lights so that the rider can see the road and avoid road hazards, and so that others can see you. Traffic laws treat bicycles like any other vehicle. That means you must have a white front and a red rear light operating if you are riding after dusk. Your bike dealer can recommend a battery or generator powered lighting system appropriate to your needs. Cannondale also strongly urges you to use a flashing light or strobe. All of us at Cannondale who ride at night or in conditions of lower visibility use flashers. They can save a life.

We strongly advocate the use of helmets on every ride. Wearing a helmet is perhaps your single best defense against a major medical catastrophe while riding, so buckle up! Parents, please set the right example, always wear a helmet.
